Bachelor Degree in Architecture and Urban Design.  
With 4 years in professional projects and improving my career solving problems. I have been worked with several projects that I was involved with friendly, enthusiastic, **creative** and **hardworking**.

Extensive experience with good points in communication, interpersonal skills, and responsive personality, ability to **work with teams**, result-oriented **performance**, with responsible and punctual attitude.

# Apartment Ondina

Interior architecture **project** of an apartment located in Salvador / BA- Brazil.

Executed by the Nágila Andrade Office with architect in charge Nilana Rocha and Interior Designer Nágila Andrade.

The project consists of the **renovation** of the living room with the integration of the balconies which includes painting, changing of the flooring, baseboard and lining.

Just like a new **modern layout** and **classic** at the same time.

Project started on August 21 and completed on October 4, 2014.

---

Clients are a couple and their children are 7 and 11 years old. They are successful businessmen of the region with little time for **social life** and so request the integration of the **gourmet balcony** with the living room.

With the **integration** there was the need to make the change in the flooring so that the balcony and living room would be on the same level.

A customer demand was that a strategy be devised to reduce chaos and dust during the construction because of their children staying a part of the day at home.

# Floor Layout Plan

Floor Layout Plan, AutoCAD Image

In this way the best solution was the use of a porcelanato and a mortar "floor-to-floor", when there is no need to remove the old floor for the settlement of the new coating.

The main request of the customers was the **comfort** for the whole family. Having a super busy life because of work they have as hobby to watch a movie accompanied by a good wine.

Thus, a **modern wine cellar** with space for wine cellar and compartments for 18 wines was developed.

---

Customers are fond of antique and classic pieces, so the layout was developed so that the pieces are the highlight in the project.

Modern furniture with straight lines in light colors so as not to contrast with the pictures, silverware and the older furniture. A real trip back in time from the old to the contemporary.

The project was developed by **AutoCAD** software and **3D in Revit**.

# Apartment Ondina - House plan & Floor plan

# Red River Cafe

Red River Café is a project of **reform**, **conservation** and **restoration** of a restaurant / bar, located in Salvador, Bahia, Brazil.

Executed by the Office of Nágila Andrade with supervision of the Architect Débora Reis and Nilana Rocha, signed by Designer Nágila Andrade.

In addition to partnerships with restorers and engineers.

---

The Red River Café has as a **concept** a café, bar and restaurant that offers the **best** of gastronomy, musicality and local culture. Divided into three **comfortable** and cozy spaces. Preserving its architecture from the second half of the 19th century.

The first space is in the outdoor area, on the balcony, it is where the bar with the beautiful view to the sea. It was built by annexing the pre-existing **architecture**.

Furniture and the pergola in wood making the environment more relaxed, elegant and functional.

---

The second space is the coffee, space that is smaller than the others but not the least comfortable.

Its wall with windows makes with the lighting and natural ventilation leave the environment even more welcoming.

And the third space is the restaurant, with capacity for 120 seats and where there are also some shows from the main local bands.

Large paneling made of wood **highlights** the work of artist Leonel Mattos. It depicts some icons of the **local culture**.
